

A **FRESH** APPROACH to Sustainable Design

WATERLESS HYBRID URINALS
○ with Jetrinse™ Solution Technology

The new Waterless Hybrid Urinals deliver unmatched performance while saving thousands of litres of water every year. This innovative fixture combines a world-class, multi-patented urinal cartridge with our revolutionary **Jetrinse™ Solution Technology** that will keep your urinals and drain lines clean, hygienic, odor-free and clog-free.

Revolutionary Jetrinse
Solution Technology purges
the housing and pipes to
prevent sediment buildup

IMPROVING A PROVEN SOLUTION

In a world of increasing water shortages—and increasingly strict usage regulations—conserving water has never been more important.

Since their introduction, waterfree and 1/8 gpf high-efficiency urinals have helped save thousands of litres of fresh water every year with each installation. When properly maintained, these fixtures provide efficient removal of liquid waste with no odor or clogs.

The challenge is, however, that improper or infrequent maintenance can lead to the buildup of solids in the drain line, which leads to reduced flow and bad-smelling restrooms. As a result, many customers are not satisfied and believe that these high-efficiency urinals don't live up to expectations.

Now, there's a new solution that combines the efficiency of waterfree urinals with the functionality of conventional flush urinals.

CARTRIDGE TECHNOLOGY

Waterless Hybrid Urinals feature a multi-patented cartridge, with Falcon Waterfree Technology, for safe, long-lasting, low-odor performance while saving tens of thousands of litres of water every year. Since the technology was introduced in 2004, there have been several improvements incorporated into the design based on feedback from customers. The latest design follows that same path and includes six all-new features to provide optimal performance.

Simplifies maintenance and optimises cartridge effectiveness

Keeps pipes and housing cleaner—The patented flexible pour spout combines with a modified cartridge outlet to concentrate and redirect the exiting urine. This significantly increases its exit speed, which helps keep the housing and pipes cleaner.

Reduces splashback—An integrated diverter shield reduces splashing while helping prevent debris from entering the cartridge.

Greener footprint—The new cartridge uses 20% less material than previous models, making it even more environmentally friendly.

Reduces odor—The patented cartridge features a reduced surface area that eliminates space for bacteria growth.

Maintenance indicator—The indicator lets you know when it's time to replace your cartridge.

Retains sealant better—A new diverter combines with the internal baffle to help retain sealant, even if a bucket of water is accidentally dumped into the urinal.

EFFICIENCY WITH A DIFFERENCE

The Waterless Hybrid Urinal doesn't use water to eliminate urine, and there's no need for maintenance personnel to manually clean or rinse the housing and drain line.

The difference occurs behind the scenes with our breakthrough Jetrinse™ Solution Technology. Every 72 hours, the system automatically purges the housing and pipes, rinsing them thoroughly to prevent the buildup of sediment.

The result is clean, odor-free operation, with virtually no maintenance aside from typical wipedowns and cartridge changes.

HOW JETRINSE SOLUTION TECHNOLOGY WORKS

Water is supplied to the back of the housing through a solenoid valve and air gap device.

The water is directed through a nozzle against the cartridge, powerfully redirecting it down the housing and drain line.

The solenoid valve is programmed to inject approximately four (4) litres of water every 72 hours.

An infrared switch, discreetly located underneath the fixture, allows maintenance personnel to manually operate the Jetrinse system during cartridge changes to confirm its operation.

HYB-4000

WATERLESS HYBRID URINAL SPECIFICATIONS

Nominal Dimensions	25 ⁷ / ₈ " x 16 ⁵ / ₈ " x 14 ³ / ₈ " 651mm x 422mm x 365mm	22 ⁵ / ₈ " x 15 ³ / ₈ " x 14" 575mm x 391mm x 356mm	21 ⁷ / ₈ " x 12 ³ / ₄ " x 14 ⁵ / ₈ " 555mm x 325mm x 370mm
Approximate Weight	68 lbs	43 lbs	54 lbs
Jetrinse™ Water Supply	3/8" NPT		
Drain Connection	2" NPT		
ADA Compliant	Yes		
Certification	IAPMO		
Manual Jetrinse Activation	Infrared switch		
Urinal Construction	Vitreous china		
Urinal Operation	Waterfree		
Jetrinse Operation	4 litres per 72 hours		
Power	6V lithium battery		

BARONIA HYB2244

FLAX HYB2255

OPTIONS TO FIT YOUR NEEDS

Waterless Hybrid Urinals come in three designs to meet your specifications and requirements. Ideal for a wide range of applications, the Hybrid Urinal line can deliver exceptional performance and outstanding savings for:

- Healthcare facilities
- Restaurants and hotels
- Stadiums
- Schools and universities
- Transportation terminals
- Office buildings

Presents a clean, elegant and efficient appearance styled to reflect your dedication to sustainability
